

**PROJECT FOR THE  
GUARANTEED  
DETECTION OF ARTESIAN  
WATER**

A decorative graphic consisting of several parallel white lines of varying thicknesses, slanted diagonally from the bottom-left towards the top-right, located on the right side of the page.

▶ Benefits of our technology

- More than 95% successful results
- Rapid water detection
- Determination of drilling points and depths in areas with difficult access
- ▶ (granite, hills, deserts)
- We find water in places where the previous contractors could not find
- Less paperwork, more guaranteed results and significant savings
- Guaranteed water volume, in case of a volume decrease of more than 30%

# PLAN OF THE WORK:

## Search and detection of water in hard-to-reach areas

1. Preliminary planning
2. Detection of drill point and marking
3. Quotes for drilling and obtaining a license for abstraction
4. Drilling
5. Audit of drilling point
6. Water source equipment

## Equipment needed for drilling and well equipment

1. Recruitment of the professional company and necessary license provided by Velasco & Sollis
2. Recruitment of equipment and personnel for drilling operations.
3. Drilling, installation of equipment for the well
4. Checking the water source

# SUCCESSFUL PROJECTS EXECUTED IN EUROPE AND SAUDI ARABIA

## Project №1

Client: Mitterfirmiansreut municipality  
Country: Bavaria, Germany  
Terrain: Granite, rock.

## Project №2

Client: Perlesroit municipality  
Country: Bavaria, Germany  
Terrain: Granite, rock.

## Project №3

Client: Exim Co., Ltd,  
Country: Kingdom of Saudi Arabia  
Location: Desert  
Branch: Agriculture

## Project №4

Distributor: Exim Co., Ltd,  
Country: Turkey  
Location: Konya  
Branch: Agriculture
